Contact/Further information: euripid@neak.gov.hu, <https://www.euripid.eu/aboutus>

EURIPID Collaboration is a voluntary and strictly non-profit cooperation between European countries according to UN definition on building up and maintaining a database with information on national prices and pricing regulations of medicinal products in a standardized format.

This online database is currently exclusively available for national competent authorities for pricing and reimbursement of medicinal products, who agreed on the rules of the collaboration and who participate actively. It contains data on **official prices of publicly reimbursed**, mainly **out-patient medicinal products** that are published by national authorities in line with the Transparency Directive 89\105\EC.

The database has been of great value to the authorities in the past years aiding them in their decision making duties. With the support from the EC, the EURIPID consortium is able to achieve even more additional value for the users.

Activities under the Grant include **the voluntary cooperation** between the national authorities

- by **further expand the information provision on the existence of managed entry agreements, prices and sales volumes of reimbursable medicinal products,**
- by **enhancing the services for users and also to the general public and**
- by **strengthening the cooperation in the field of pricing of medicinal products** (e.g. establishing a **Dialogue Platform with stakeholders**).

The collaboration will **enhance public interfaces of the EURIPID website** and **establish regular newsletters** so that more information about its activity will be shared with the general public; the **spreading of the recommendations of the technical Guidance Document on External Reference Pricing** developed in the previous grant period; the **extension of the data content of the database to non-reimbursed but regulated priced products.**

26+ European Countries participating

10 000 000+ Price References of medicinal products

24h online availability of database

11+ Years of Experience of project partners

2009 First financial contribution by EU

60% Funding by national Pricing and Reimbursement Authorities
